

DSTS4

Small DMX

Splitter/Booster

The DSTS4 is a small 4-channel portable splitter / booster of the DMX signal. Every output features LED indication of the DMX status and is optically isolated up to 1000V. The unit also provides a true output for easy daisy-chaining of other DMX devices.

This device is a smaller version of DST4 including a built-in power cable (DST4 features a separable PowerCon power cable). DSTS4 does NOT provide the option of a W-DMX module or the straps for the truss mounting, but is suitable for every budget.

The MOQ is 10pcs of a kind.
